

Scalability & Future Plan

Date	03 JULY 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure Of Well-Being
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited dataset size	May reduce prediction accuracy for diverse countries	High
2	Static machine learning model	Performance may decrease as new data becomes available	Medium
3	Basic user interface	Limited user interaction and visualization	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited users	Deploy on cloud with scalable infrastructure to handle multiple users simultaneously
2	Data Storage	Stores current dataset locally	Use cloud databases for larger datasets and better management
3	Performance	Basic prediction speed	Optimize model and implement caching techniques for faster predictions
4	Security	Basic input validation	Add authentication, secure APIs, and encrypted data communication

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Integrate larger global well-being datasets	Short Term	Improve prediction accuracy
Phase 2	Add interactive dashboards and data visualizations	Medium Term	Better user experience and analysis
Phase 3	Implement advanced machine learning algorithms	Long Term	Higher prediction performance
Phase 4	Develop mobile-friendly and multilingual support	Future Release	Increased accessibility and wider user adoption
