

## Project Demo Planning

|                      |                                       |
|----------------------|---------------------------------------|
| <b>Date</b>          | 03 JULY 2026                          |
| <b>Team ID</b>       | XXXXXX                                |
| <b>Project Name</b>  | A Comprehensive Measure Of Well-Being |
| <b>Maximum Marks</b> | 1 Mark                                |

### Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section                     | Description                                                                                                                            | Duration (mins) | Responsible Member             |
|------|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|-----------------|--------------------------------|
| 1    | Introduction & Problem Statement | Introduce the project and explain the importance of measuring well-being using multiple development indicators.                        | 1               | Hanshika Devi Vedula           |
| 2    | Dataset & Machine Learning Model | Explain the dataset, preprocessing, feature selection, model training, and evaluation process.                                         | 1               | Hanshika Devi Vedula           |
| 3    | Application Demonstration        | Demonstrate the Flask web application by entering input values and generating the predicted Well-Being/HDI score with recommendations. | 1               | Hanshika Devi Vedula           |
| 4    | Deployment                       | Show the deployed application on Render and verify live prediction functionality.                                                      | 1               | Sri Datta Satyanarayana Veeram |
| 5    | Results & Conclusion             | Summarize the project outcome, prediction accuracy, and key benefits of the application.                                               | 1               | Sri Datta Satyanarayana Veeram |
| 6    | Q&A                              | Answer questions related to the project implementation and deployment.                                                                 | 1               | Sri Datta Satyanarayana Veeram |

### Demo Flow Summary:

| Step | Activity                                    | Notes                                                                          |
|------|---------------------------------------------|--------------------------------------------------------------------------------|
| 1    | <b>Introduction &amp; Problem Statement</b> | Explain the objective and significance of the Well-Being Prediction project.   |
| 2    | <b>Solution Overview</b>                    | Discuss the dataset, ML model, Flask application, and deployment architecture. |

|   |                                   |                                                                                                                         |
|---|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| 3 | <b>Live Feature Demonstration</b> | Demonstrate the deployed application by entering sample inputs and showing the prediction results with recommendations. |
| 4 | <b>Q&amp;A Session</b>            | Respond to questions about the model, deployment, and application workflow.                                             |
